

CICS Appreciation

Abstract

This is the introductory class in the CICS series and is an excellent foundation upon which to build future CICS skills.

Prerequisites

None.

Audience

All disciplines **EXCEPT** students planning to attend the 'CICS Application Programming Workshop' class where appropriate introductory material will be covered.

Objectives.

At the end of the course the student should have a good understanding of the structure of CICS and be able to:

- Feel confident and participate constructively in discussions on CICS on return to the workplace
- Demonstrate a good foundation knowledge about the CICS product
- Assess what future training would be of benefit if any.

Topics covered in this course include:

- Introduction to CICS Architecture and Terminology
- Application Design
- EXEC Interface
- Program Management
- Terminal Services

- Accessing Files
- Transient Data
- Temporary Storage
- Interval Control
- Storage Management
- Intercommunication
- Debugging
- Business Transaction Services
- Review Questions

Course Duration

2 days
